

Jacob Rees - Frontend Engineer

London | [+44 7519 411909](tel:+447519411909) | jacobrees@me.com | linkedin.com/in/jacobreesdev | github.com/jacobreesdev | jacobrees.co.uk

PROFESSIONAL SUMMARY

Frontend Engineer with 4 years' commercial experience shipping React, Next.js, TypeScript and Vue products across higher education and retail. Product-design background in Figma, UX, interaction design and WCAG 2.2 AA, plus full-stack delivery across CMS/API integrations, experimentation, analytics, testing and CI/CD.

WORK EXPERIENCE

Frontend Engineer, Revolution Viewing / Vepple (vepple.com)

Mar 2023 – Present

- Drive frontend and product-design delivery for Vepple, a personalised virtual campus platform trusted by 30+ universities and 500K+ students, across Vue/GraphQL and Next.js/TypeScript/Payload CMS rebuilds with CI/CD and automated testing.
- Designed and built an Events Management System with Firebase real-time chat, timezone-aware schedules and 1-second status updates, increasing views/session by 108%.
- Built GrowthBook A/B testing and GDPR-compliant GTM/GA4 tracking; ran 15 production experiments for 20K+ users and increased click rate by 19.2%.
- Engineered Mapbox GL JS Explore by Map with personalised filters, directions and GPS wayfinding; benchmarked outcomes include 21 pages/session, +68% page depth and +64% engagement time.
- Enhanced WCAG 2.2 AA Guided Tours with live captions, ambassador content and Content Spots; Guided Tour users see +65% pages/session, +50% engagement time and 4.3-star satisfaction.
- Mentored a junior engineer through code reviews and pair programming, ramping them to independent feature delivery within 4 weeks.

Web Developer, Pavers (pavers.co.uk)

Aug 2022 – Mar 2023

- Designed and built a WCAG 2.1 AA component library of 75+ React/Shopify Liquid components across 5+ brands, using Storybook and Sanity CMS to support rapid page customisation.
- Integrated retail-media sponsored placements into Algolia search across a 10,000+ product catalogue, increasing conversion by 11.4%.
- Combined Lucky Orange session data with a weather API to deliver location-aware recommendations, increasing conversion by 8.9%.

PROJECTS

Full-Stack Developer, CanonCore ([Demo Website](#) | [GitHub](#))

Dec 2025 – Present

- Built a Next.js/TypeScript and React Native/Expo media library that turns Google Drive into a Netflix-style product, with playlists, watch progress, sharing and a canonical metadata model supporting TMDB, Google Books, MusicBrainz and custom providers.
- Delivered a high-craft responsive UI system with server-rendered media, keyboard/screen-reader support, reduced-motion paths, Storybook coverage and 96 Lighthouse performance.
- Modelled the library as a PostgreSQL DAG so one canonical item can live across multiple collections, supporting graph-style browsing, reordering and multi-placement without duplicating data.
- Engineered authenticated Google Drive streaming through a byte-range media proxy with OAuth 2.0 and encrypted refresh tokens, keeping Drive IDs and raw URLs out of the browser.

SKILLS

- Languages: TypeScript, JavaScript, HTML, CSS
- Frontend: React, Next.js, Vue.js, React Native, Tailwind CSS, Storybook, Figma, Design Systems, WCAG 2.2 AA
- Backend: Node.js, tRPC, GraphQL, REST APIs, PostgreSQL, Prisma, Firebase, Payload CMS, Sanity CMS
- Testing & Product: Playwright, Vitest, Jest, GrowthBook, GA4/GTM, Mapbox GL JS, GitHub Actions, CI/CD, Vercel

EDUCATION

BA in Digital Media, University of Leeds

Jul 2022

- 2:1 overall; First in final coding project.
