PROFESSIONAL SUMMARY

Front-End & UX Engineer with 3 years in higher education and e-commerce, shipping React and TypeScript products from Figma to production. WCAG 2.2 AA accessibility and A/B-tested conversions baked into every release.

WORK EXPERIENCE

Front-End & UX Engineer, Revolution Viewing (vepple.com)

MAR 2023 – PRESENT

- Led front-end and UX development on the original Vue.js platform consuming a GraphQL API, reaching 1M+ students with 12+ pages and 7 minutes per session across 30+ UK universities.
- Spearheaded ground-up front-end rebuild with the CTO and Product Manager, replacing Vue.js with a production-grade Next.js 16 and TypeScript stack with full CI/CD and automated testing.
- Architected Events Management System with Firebase real-time chat, 1-second status engine, and timezone-aware scheduling, delivering 108% increase in views per session.
- Built production A/B testing framework with GrowthBook SDK, running 15 experiments across 20K+ users with +19.2% click rate uplift. Integrated GDPR-compliant tracking and GTM analytics.
- Engineered Explore by Map feature with Mapbox GL JS, directions API, and GPS tracking. Map users averaged 21 pages per session with 64% longer session duration.
- Enhanced panorama Guided Tour suite (WCAG 2.2 AA) with live captions and Content Spots, driving 65% more pages and 50% longer sessions.
- Mentored a junior engineer through code reviews and pair programming, accelerating their ramp-up to independent feature delivery within 4 weeks.

Web Developer, Pavers (pavers.co.uk)

AUG 2022 – MAR 2023

- Built a WCAG 2.1 AA-compliant responsive component library of 75+ components across 5+ brands using React, Shopify Liquid, and Storybook, working with design and content teams to enable page customisation via Sanity CMS.
- Integrated retail-media sponsored placements into Algolia search, driving an 11.4% conversion uplift across a 10,000+ product catalogue.
- Combined Lucky Orange session data with a weather API to serve location-based product recommendations, resulting in an 8.9% conversion lift.

SKILLS

- Languages: JavaScript, TypeScript, HTML, CSS
- Technologies: React, Next.js, Vue.js, React Native, Expo, TanStack Query, Zustand, Redux, tRPC, Node.js, GraphQL, REST APIs, Tailwind CSS, Storybook, Figma, PostgreSQL, Firebase
- Testing: Vitest, Playwright, Jest, Maestro, WCAG Accessibility, A/B Testing
- Infrastructure: Git, GitHub Actions, CI/CD, Vercel, Google Tag Manager & Analytics

EDUCATION

BA in Digital Media, University of Leeds

JUL 2022

- Achieved a 2:1 overall with a First in the final coding project.

PROJECTS

Full Stack Developer, CanonCore (Demo Website | Github)

JUL 2025 – PRESENT

- Developed a cross-platform media library combining Obsidian's knowledge graph with Plex-style playback over Google Drive, using React (Next.js), React Native (Expo), type-safe tRPC and PostgreSQL.
- Designed items as a DAG with 8 entity types (cast, characters, franchises) and 9 relationship types, browsable through an interactive PIXI.js + D3 force graph on web and mobile.
- Implemented 11 optimistic mutation flows via TanStack Query and Zustand, with dnd-kit drag-drop reordering, position-persistent playback and mark-watched, each rolling back on server failure.
- Shipped 392 Playwright E2E tests across three browsers, 19 Maestro mobile flows and 326 PGlite integration tests, catching visibility leaks and regressions at CI.
